

Grow a Bean Plant

Materials:

- Styrofoam cup
- potting soil
- 2 bean seeds

Directions:

1. Fill the Styrofoam cup with potting soil (about half way).
2. Plant the bean seeds in the Styrofoam cup.
3. Cover the bean seeds with potting soil, and fill the Styrofoam cup (about three quarters) with potting soil.
4. Water the bean plant. Be careful not to add too much water!
5. Place the bean plant near sunny windowsill.
6. Care for this example of God's creation by watering and observing your bean plant every other day. Draw pictures of the changes that you see.
